

I am writing in support of "K-Love" FM translator services. K-Love provides excellent service delivering Christian Alternative Music, as well as news, weather, and community service broadcasting. There are zero alternatives today for this family friendly programming on FM channels. To lose K-Love's signal to LPFM stations broadcasting less family friendly programming would be a great loss to our community. K-Love's programming serves a large sector of mainstream Christian community needs promoting sound Family centered Christian ethics and viewpoints that is in the public's interest and should be preserved over other uses for this bandwidth. LPFM stations should not be given priority over FM translator services.
